Powell, Addison M.

Trailing and Camping in Alaska, by Addison M. Powell; \$2.00 net, postage 15 cents; 380 pages; liberally illustrated; A. Wessells, care Newold Publishing Co., New York.

In this book, written by a man who for twenty years has been following the trail in Alaska, the reader will be conscious that he is reading the naked truth by one who really has been on the ground, struggling with the wild and suffering its pangs of hunger, and that this is not a book written by one of those who enjoy the best to be had in the frontier towns and write of things they have heard. The insight the author gives into the hardships of prospectors, into the manners and customs of the Indians and whites, wonderful bits of description of scenery, glaciers, swift-running rivers, canyons, whirlpools, volcanoes; of the flora of that short summer of the midnight sun; of encounters with grizzlies, the shooting of such wild game as moose and caribou; glimpses of human tragedy, of human sympathy and unselfishness—it all makes up an absorbingly interesting and well-told tale.

# Back, George, Arctic Capt.

1836

612 **Back** (G.) Narrative of the Arctic Land Expedition to the Mouth of the Great Fish River and along the Shores of the Arctic Ocean in the years 1833-35, *map and plates, India paper proofs, LARGE PAPER, 4to., half calf, 30s* 1836

Back's narrative in the 8vo size is fairly common, but in this size (4to, Large Paper) is particularly rare and uncommon. It has been said of this work that no intelligent comprehension of the

character of the savage tribes of the Frozen Regions of North America can be obtained without reading the narratives of Captains Franklin and Back. Certainly his work is crowded with every detail relating to his intercourse with the Crees, Chippewyans, Dog Rib and Coppermine Indians, with full descriptions of their mode of living and peculiarities. As he had to depend upon them for subsistence during the terrible privations of an Arctic winter, his experiences must be worth having.

Voyage of the Blossom

**BEECHEY**, Capt. F. W. Narrative of a Voyage to the Pacific and Bering's Strait, to co-operate with the polar expeditions, performed in His Majesty's Ship Blossom, in the years 1825-28. Phila., 1832. 8vo., boards, cloth back, uncut, small embossed stamp on title (not library stamp), slightly foxed. \$3.50

*see for*  
Beechey, F. W. 8<sup>o</sup> London 1831 2 vols  
4<sup>o</sup> London 1831 2 in 1 Libr. C. H. M.

**Beechey** (Capt. F. W.) Narrative of a Voyage to the Pacific and Beering Strait to co-operate with the Polar Expeditions, performed in His Majesty's Ship *Blossom*, in the years 1825-28, published by authority of the Lords Commissioners of the Admiralty, *maps and views*, 2 vols, 8vo., new half calf, 25s 1831  
Two chapters are devoted to the Indians of California, and two other chapters contain a relation of personal adventures among the Esquimaux, with descriptions of their peculiar habits and customs. The Author gives an insight into the Californian Missions, which is greatly interesting. The Mission Fathers, long isolated from the civilized world, had become as severe tyrants in their little monarchies as any of the secular class, and regularly recruited their subjects from the wild tribes of savages by expeditions against them, in which fire and sword had more victims than the cord and the prison.

Arctic

1904

157 **Hanbury** (D. T.) Sport and Travel in the Northland of Canada, *maps and numerous plates, plain & coloured*, 8vo., cl., 12s 6d 1904

"In this narrative I have endeavoured to give a plain unvarnished account of twenty months' journeying through the Northland of Canada. I have written of the Eskimo as I found them, having lived their life, sharing their habitations, clad in deerskins, and subsisting on caribou and musk-ox meat in winter, or fish in summer. Of the Indians with whom I have been much longer acquainted than the Eskimo, I have written without prejudice."—*Preface*.

Some of the plates are beautifully printed in colours, depicting the Musk-Ox, Deer crossing water, Eskimo signalling, Arctic Butterflies, &c.

Nesting

Birds

*Agelaius phoeniceus*  
Hulton Chain

NESTING.

1878, June 4-11. Several pairs breeding near  
head of 3<sup>d</sup> Lake.

ADIRONDACKS.

*Ampelis cedrorum*

NESTING.

1879. June 8. Commenced nesting at Locust Grove.

LOCUST GROVE, NEW YORK.

*Bartramia longicauda*

WESTING.

LOCUST GROVE, NEW YORK.

1882, June 18. At Locust Grove, New York,  
dozens young caught in meadow &  
adult shot.

*Bonasa umbellus*

WESTING.

Tuttle Chain

1878. June 4-11. Common with small young.

ADIRONDACKS.

*Bonasa umbellus*

NE ST

1-11-13 COUNTY, NEW YORK

1883, May 2. At Lisquet Grove, N.Y. I found a nest containing seven eggs. The nest consisted merely of a depression in the ground between the roots of a beech tree & lined with dead leaves. It was concealed by some brush.

" May 20. The above bird is still setting.

1884. June 17. Saw a young.

" June 28. Saw a hen brood with her brood of  $\frac{1}{4}$  grown

" chicks in the grass near my office.

*Bonasa umbellus*

NE TWO.

at Lisquet Grove, N.Y.

1878. May 2/78. Frightened a hen partridge from her nest, which was simply a slight hollow in the ground lined with a few hemlock twigs & beech leaves, & a dozen feathers which were doubtless worn from her belly while sitting. The nest was between the roots of a beech on a little knoll with moss all about it. It contained 10 nearly fresh eggs.

1878. June 1. Started an old hen with a lot of young about 3 days old. Caught 10 of 'em for J. W. I, 72-73.

10033-57073

*Bucephala clangula*

NESTING.

Fulton Chain

1878, June 6. Downy young taken on pond  
just south of 4<sup>th</sup> Lake.

ADIRONDACKS.

*Buteo lineatus*

NESTING.

1878. April 13. "Frightened a Buteo lineatus from  
her nest - she evidently is sitting". C.S.M.

ADIRONDACKS.

*Buteo lineatus*

NESTING.

LOCUST GROVE, NEW YORK.

1878. April 24. Just at dusk shot ♀ as she left her nest in high maple in Fox Hill Swamp.  
Apr. 25. In eve. shot her ♂ as he left the nest.  
Apr. 27. Climbed the tree by means of ladder, rope & 'creepers'. Found 4 beautiful eggs. Nest full 50 ft. high. It is over 3 ft. deep (thick) & 5 ft. across. Male known this nest at least 8 years. Eggs contained embryos not over inch long. Frightened ♀ from nest Apr. 5 & after. Largest embryo could not have been  $\frac{1}{4}$  developed, hence period of

*Carpodacus purpureus*

NESTING.

LOCUST GROVE, NEW YORK

1878. June 1. Found nearly completed nest on a balsam (*Abies balsamea*). It was about 7 metres from the ground. Watched the ♀ break small dead twigs from a fallen hemlock (*Abies canadensis*) & carry them to her nest. She made a trip about once a minute & was not assisted by the ♂, who sat singing in an adjacent tree.

incubation must exceed a month & I  
believe it cannot be less than 6 weeks.

VERSO

*Chrysomitris pinus*

## NESTING.

Lynn's Hall.

1878.

LEWIS COUNTY, NEW YORK

1878, April 1<sup>st</sup>. "Went to Luyon's Falls in eng. and  
A. Jerning Luyon showed me nest & fresh  
eggs of Chrysomitris pinus which he has  
just taken. He has found another nest  
& says the birds are abundant all about the  
Falls." (Jour. I, 6.) - com.

1878, April 13. Found a nest at Locust Grove. It contained 2 nearly-fledged young.

1878. Apr. ~~16~~ 16-18. Big Otter Lake - all hatched -  
See Jour. I, 28-33.

*Chrysomitris tristis*

1873, Aug. 5. Nest + 5 eggs.

1878. July 18. " 4 fresh eggs.

11 011 024. 11 4 4 11 11

" Sept. 20. " + 4 nearly fledged young.

*Colaptes auratus*

NESTING.

1878.

LOCUST GROVE, NEW YORK.

1878. May 21. Climbed to a *Colaptes*' nest which was 15 inches deep but as yet contains no eggs.

1878. June 19. Found nest containing young.

" July 4. ♂ im. shot.

*Contopus borealis*

Fulton Chain

1878

1878, June 4-10. 3 ♀ shot. Lard contained eggs nearly ready for the nest.

*Contopus virens*

1873. June 19. Nest & 3 eggs.

*Corvus Americanus*

1873, May 19, 4 nearly fresh eggs.

1883, May 13. Young in nests.

*Corvus Americanus*

NE. G.

LEWIS COUNTY, NEW YORK

1878. April 10. "Crows are evidently sitting" - at  
Lacrosse Lake. C.S.M.

1878. Apr. 13. A. J. Dayan tells me he found a nest  
with young at Dyer's Falls. C.S.M.

1878. April 28. There are young in some crows  
nests, while others contain nearly fresh eggs.

1878. July 4. Young shot.

*Dendroica aestiva*

Nest

LEWIS COUNTY, NEW YORK

1880. May 28. Nest of 4 eggs.

*Dolichonyx oryzivorus*

NESTING.

1873. June 7. Nest of 6 eggs in our meadow.

1873. June 7. Nest of 6 eggs in our meadow.

*Ectopistes migratorius*

1878.

NESTING.

1878. June 4. On the Brunswick road, a few miles in from Moss River, Pigeons were breeding sparingly & Dr. C. L. Bagg picked a full-fledged adult from the nest.

1878. June 4. On the Brunswick road, a few miles in from Moss River, Pigeons were breeding sparingly & Dr. C. L. Bagg picked a full-fledged adult from the nest.

*Ectopistes migratorius*

NESTING.

1878.

ADIRONDACKS.

1878, June 4-11. Found *Ectopistes* abundant along road from Moose River to Sutton Chain & about the chain of lakes. A nearly fledged young was taken from nest near Moose River June 4; a fresh egg from nest in swamp 3 miles south of 4<sup>th</sup> Lake a few days later; & an egg nearly ready to hatch from knoll within 20 rods from Sheppard's camp at Pine Point. Several full-grown young were shot. Nests contained but one egg or young each. 2 were within easy reach from ground; the other about 10 metres high.

*Empidonax minimus*

NESTING.

LOCKPORT GROVE NEW YORK.

1879, May 22. nest nearly completed in beech near house.

*Falco sparverius*

NESTING.

at Locust Grove, N.Y.

1878. April 24. Shot a ♀ containing an egg with shell perfectly formed & pure white.

Lamie day found two Sparrow Hawk's nests, but both were in stiles too high to climb.

1878. July 12. Shot 2 ♀ young - early for young to be flying.

*Hirundo horreorum*

NESTING.

1878. April 28. Building in grand old barn.

LOCUST GROVE, NEW YORK.

*Hirundo horreorum*

Hulton Chain.

1878, June 4-11. Found nesting in boat house  
at Lorge, foot of 1<sup>st</sup> Lake.

ADIRONDACKS.

*Lecturus gallula*

1878. May 22. Building.

" June 27. Shot young.

1879. May 15. A pair commencing to build in a bush  
in front of our house.

" June 19. Young have left the nest.

LOOSE ABOVE.

*Juncos hyemalis*  
at Locust Grove, N.Y.

1878, May 2. "Found a pair of *Juncos* building  
a nest of dry grass" (Jour. I, 47).

1883, June 23. ~~Caught~~<sup>2</sup> fledged ~~from~~ young.

*Juncos hyemalis*  
4<sup>th</sup> Lake Fulton Chain.

1878, June 8. Nest of 4 fresh eggs.

*Sturnus ludovicianus cauculitoroides*

NESTING.

LEWIS COUNTY, NEW YORK

1880. May 26. Found nest in Lewis County, N.Y.  
(between Liscomb & Constableville). It  
was in a thorn-apple tree 7 ft. from  
ground & was bulky & very thorny.  
It contained 6 badly set-in eggs. Next day,  
May 27, shot & took the nest.

*Melanerpes erythrocephalus*  
at Liscomb & Constableville.

NESTING.

1878. May 29. Saw *Melanerpes* emerge from  
hole in stub, & on shaking it heard young  
birds within.

1878. June 19. Nest with young.

1878. July 5. Saw several full-grown young flying.

1883. July 20. Young now commencing to fly.

1884. July 12. Saw young flying, but not in stub.

" near museum have not yet left the nest.

" July 14 Young left the nest by museum today.

Liscomb & Constableville

Melospiza melodia

G.

1878. July 7. Nest with young.

1883. May 20. Nest + 2 eggs.

1884. May 11. Nest + 4 eggs.

1885. June 6. Found two nests containing just-hatched young.

Mergus mercanser  
Saulton Chain.

NESTING.

1878. June 4-11. Several broods seen. Killed  
4 downy young on 4<sup>th</sup> Lake.

ADIRONDACKS.

# *Merula migratoria*

1873. May 7<sup>th</sup> 4 eggs.

1883. ~~May 3~~ May 3. Robins are sitting

" May 13. Some have young, white others are  
" still building.

" May 20. Most Robins now have young.

1884. April 30. Robins sitting.

1885. May 12. Robins everywhere nesting & many have  
" nearly completed clutches.

" June 3. Many have young several days old, while others are  
" now hatching.

## *Molothrus ater*

at Locust Sound, N.Y.

1878. May 8. Last ♀ containing egg nearly ready  
to be laid.

NESTING.

*Mijarchus crinitus*  
near Locust Grove, N.Y.

NESTING.

1878. June 1. Shot ♀ containing an egg  
on which the shell had already begun  
to form.

*Passerculus savana*

NESTING.

1878, June 16. Young seen.  
" " 27. Young ♂ shot.

*Perisoreus Canadensis*

NESTING

Fulton Chain.

1878. June 8. Shot two fully-fledged young  
about 3 miles south of 4<sup>th</sup> Lake. 2  
very handsome dark plumage.

ADIRONDACKS.

*Petrochelidon lunifrons*

NESTING.

1878. April 28. Some swallows are making  
their <sup>new</sup> nests under the eaves of Grandpa's  
old barn.

1879. July 17 Young & old circling over barn.

1883. May 3. Repairing nests under eaves.

LOCUST GROVE, NEW YORK.

*Picus Americanus*

NESTING.

1878.

1878, June 4. Both parents & 4 fresh eggs taken  
from ~~lance~~ near Middle River -  
(See Jour. I, 75-76).

ADIRONDACKS.

*Picus pubescens.*

1873, May 28. 3 fresh eggs.

1878, June 27. Young shot.

*Picus pubescens*

Hutton Chain.

1878, June 4-10. Young seen flying about.

ADIROND. CKS.

NESTING.

*Passerculus gramineus*

at Lacrust Sound, N.Y.

1873, May 26. 4 fresh eggs.

1878. May 3. 2 fresh eggs.

" June 18. Young flying about.

" July 7. Nest with young.

1879. July 19. Caught a young.

*Quiscalus anaëus*

NESTING.

June 12, 1881. Young  $\frac{2}{3}$  grown & flying about our yard.  
May 23, 1880. Young large enough to fly.

LOCUST GROVE, NEW YORK

*Sayornis fuscus*  
at Dixon's Falls, N.Y.

NESTING.

1878. May 10. Just hatched 5 young.

1878. July 13. At Locust Grove shot young flying.

1879. April 28. " " " nest just completed.

1883. July 25. At Sugar River Cane found nest & 4 fledged  
young in cane at least 8 ft. below surface.

LEWIS COUNTY, NEW YORK

*Setophaga ruticilla*

1873. June 7. Nest & eggs of two pairs.

*Sialia Lialis*

NESTING.

LEWIS COUNTY, NEW YORK.

1878. May 18. On a mud flat near Black River  
below Dyson's Falls, N.Y., A. Jennings Bryan & I  
found the nest of ~~two~~ species in a  
stake. It contained young.

1879. May 10. Nest nearly completed.

" June 13. Full-fledged young flying.

" July 8. The pair spoken of under May 10<sup>th</sup> are refairing

" their nest preparatory to a second brood.

1883. June 23. Saw full-fledged young.

*Sialia sialis*

NESTING.

LOCUST GROVE, NEW YORK.

1878. April 22. Put my finger into a hole in a dead stub & caught a ♀ on her nest. She was much enraged & flew about close above my head uttering angry cries. Took 5 eggs containing small embryos about a week gone. Hence first egg could not have been dropped later than the 10<sup>th</sup> - a very early date.

Stub 2½ ft. in diam. at base & 12 ft high: quite rotten. Hole ½ inch in diam. & 6 ft. from ground - open due west.

*Sitta Canadensis*.

NESTING.

Big Otter Lake, N.Y.

1878.

LOCUST GROVE, NEW YORK.

1878. April 17. Found the nest of a pair of Red-bellied Nuthatches in a stub (dead but not rotten) which stood in the water on the north shore of Big Otter Lake, in Seneca Co., N.Y.

The hole, which they had evidently drilled themselves, was about 18 ft. high & opened north-west. The stub, a maple, & quite hard, measured 10 inches in diameter at water level.

The female kept flying back & forth from the hole to a neighboring spruce limb & was engaged, apparently, in carrying small bits of bark to the nest, which as yet contained no eggs, but was 4 inches deep & about an inch in diameter at entrance.

*Sitta carolinensis*

NESTING.

LOCUST GROVE, NEW YORK.

1878. Apr. 13. Shot a ♀ *Sitta carolinensis* containing one nearly ready for deposition; the largest surely could not have remained in her more than another day. - C. J. M.

*Siurus auricapillus*

Fulton Chain.

NESTING.

1878.

June 8/78. Nest with  $\frac{4}{7}$  fresh eggs.

ADIRONDACKS.

## *Sinus auricapillus*

1873, June 6. Nest 4 5 eggs.

" July 3. " " 4 fresh eggs.

1878, May 25. Saw one with dead leaves in bill.

1884, June 20. Found several spotted young just from the nest.

" June 22. Found a nest containing four newly-hatched young.

## *Sphyrapicus varius*

NESTING.

1878. July 12. Shot young.

1879. July 6. Young destroying mt. Ash trees.

*Spizella socialis*

NESTING.

LOCUST GROVE, NEW YORK.

1878. May 21. Nest with 1 egg.

" June 16. Young seen.

" " 27. " shot.

" July 7. Found nest with young; also nest with eggs.

1879. June 8. Nest with 3 young + 1 of *halicturus*.

1883. June 23. Caught a fledged half grown young.

*Sturnella magna*

NESTING.

at Locust Grove, N.Y.

1878.

1878. May 10. Nest with 6 fresh eggs.

LOCUST GROVE, N.Y.

*Tachycineta bicolor*

NESTING.

1878.

LEWIS COUNTY, NEW YORK.

1878. May 18. In a stub on a mud flat near Black River, below Lysen's Falls, N. Y., A. Jennings Sayan & I found the nest of a pair of White-bellied Nuthatches. It contained 6 fresh eggs lined with large goose feathers (averaging  $3\frac{1}{2}$  inches in length). Nest 3 feet from ground.

*Turdus fuscescens*

NESTING.

LEWIS COUNTY, NEW YORK.

1878, May 22. Shot *Turdus fuscescens* ♀ with dead leaves in her mouth & her ovaries were large - showing clearly that she was then at work on her nest. The species has been here but ten days.

# Turdus migratorius

NESTING.

LEWIS COUNTY, NEW YORK.

1878. April 10/78. "A number of Robins are building."  
 " April 12. "A number of Robins' nests are nearly  
 " completed now."  
 " April 28. Most Robins are setting, but some  
 " have not yet finished their nests.  
 " May 11. Found a Robin's nest with eggs, & others  
 " with young.  
 " May 11. It is a singular fact that <sup>some</sup> Robins are still  
 " building, while most have young.  
 " May 20. Four pairs of Robins have their nests in  
 " our carriage barn.  
 " May 25. Saw several full-grown young Robins. June 14, Eggs.

# Turdus migratorius

NESTING.

LEWIS COUNTY, NEW YORK.

1879. April 30. Several nests nearly completed in  
 the vines on our barn, & one contains  
 the full complement of eggs (4).  
 " May 14. Several nests of young Robins about  
 the house.  
 " May 31. Have seen several young flying lately.  
 " June 8. Young numerous.  
 1880. May 23. Young large enough to fly.

VERSO

1878. July 7. nests with young.

*Turdus pallasi*

1879

LOCUST GROVE, NEW YORK.

1879. Aug. 24. Found in Coe's woods, at Disenst  
Brook, N.Y., a nest containing 3 eggs of  
*Turdus pallasi*.

Sept. 7. This same nest contained 3 young  
which could not have been hatched  
more than a couple of days at most.

*Turdus swainsoni*  
Fulton Chain

NESTING.

1878, June 7. I shot near 4<sup>th</sup> Lake. She  
contained an egg nearly ready for nest.

1878

## *Dryanassa carolinensis*

1873. June 23. Nest + 3 eggs.

1878. June 28. Nest + 3 eggs - apparently far gone.

1879. June 7. Nest + 4 eggs in our orchard.

## *Vireo olivaceus*

1873. June 11. 2 fresh eggs.

" " 20. 2 eggs + one of Cow-bird.

1875. July 2. Caught young just out of nest.

1878. June 16. 3 fresh eggs.

" July 26. Caught young unable to fly.

*Zamelodia ludoviciana*

1873. July 3. Found the birds building. About a month before this C. L. Bagg got a nest with eggs.

*Accipiter fuscus*

1876, Aug. 13. One dove & struck bird cage on our piazza. I fired at & missed him as he left.

*Totanus solitarius*

1873, Aug. 18. Shot ♂ ad. on Sarrett's Lake.

LEWIS COUNTY, NEW YORK

*Syrnium nebulosum*

1877, Dec. 25. Heard host in cage.

LEWIS COUNTY, NEW YORK

*Sitta Canadensis*

Home in winter

1875, Dec. 23. Common in the woods. 2 shot.

LEWIS COUNTY, NEW YORK

*Melospiza Lincolnii*

1873.

Shot near White River May 23, 1873. Com.

LEWIS COUNTY, NEW YORK

*Oedemia Americana*

1877

Sept. 27 A. J. Sayan shot on Black River  
at Lyon's Falls, & I skinned one of them.

*Otus Wilsonianus*

1873.

Shot ♀ May 8, 1873. Another May 18.

*Pinnicola enucleator*  
in Lewis Co.

1874, Dec. A few shot.

1875, Dec. Common. Killed a number

LEWIS COUNTY, NEW YORK.

*Radilymna fasciata*

1873, Aug. 18. C. L. Bagg & 2 shot on Sarrett's Lake.

LEWIS COUNTY, NEW YORK.

*Pyrranga rubra*

1876, Aug. 16. Shot a ♂ juv. near home.

LEWIS COUNTY, NEW YORK

*Sayornis fusca*

1873. June 23. Hatched young caught.

LEWIS COUNTY, NEW YORK

*Bonasa umbellus*

LEWIS COUNTY, NEW YORK

1873. July 25. Between Moose River & Targel shot  
half-grown young.

*Certhia familiaris*  
In winter.

LEWIS COUNTY, NEW YORK

1875, Dec. 28<sup>th</sup>. Shot in woods, home.

*Cyanura cristata*  
at Homewood.

1875. Dec. Seen several times. Dec. 28, shot 2.

LEWIS COUNTY, NEW YORK

Aegialitis semipalmata

Ramsey B. Hough shot a young, but  
full grown, individual of this species  
at Albany Lake, Aug. 16, 1882. He saw  
another with it.

Calyptra septentrionalis

Ramsey B. Hough has a specimen  
that was shot at Crum's Pond  
Lenox Co. Dec. 1, 1881.

## *Salvelinus fontinalis*

1873. July. Big Moose Lake. At Lakes of 2nd Lt  
I caught 21 (in Aug. of July 11) that dressed  $8\frac{1}{2}$  lbs.  
During the next week we caught several  
at lumps in the main lake, that weighed  $1\frac{1}{2}$   
& 2 lbs. each.

## *Chelydra serpentina*

1873. July 14. Found a number of old eggs on  
the sand bar of the island in Big Moose.  
1874, Aug. 19. Caught a huge snapping turtle on  
the Big Marsh. Saved his shell & skeleton.

## *Ulmus Americanus*

The Giant Elm of Coe's Meade.

Measured 29 ft. in circumference 4 ft. above the ground, & 20 ft. " " 9" " " ground.  
Blow down in gale in Nov. 1882 & measured 125 ft. in length. Trunk columnar & symmetrical.

## *Ardea herodias*

1873, July 16. Visited the Heronry at head of Big Moose Lake. One nest contained two full-grown young. July 22 & 23 went there again & got 2 young & one adult. C. L. Baggs kept one young alive.

*Zonotrichia leucophrys.*

1873, June 2. Saw several between Moose  
River & the Fulton Chain.

1873, July 10. Saw it at Big Moose Lake.

*Colymbus torquatus*

1873. July 20. C. L. Baggett & I shot two very  
young ducks in North Bay of Big Moose Lake.

*Psocetes graminea*

LOCUST GROVE, NEW YORK.

1885. Aug. 19. Molt far advanced. Primaries  
& secondaries all new, though not  
all full grown - 1<sup>st</sup> & 2<sup>d</sup> primaries  
less than half grown - rest nearly  
or quite full size -

*Chrysomitris tristis*

1878

at Locust Grove, N.Y.

1878. April 30 - May 1: "Not quite through  
moulting yet".

LOCUST GROVE, NEW YORK

*Passerculus savanna* ♀ ad. (2 specimens)

1885. Aug. 6. Molt nearly completed.

Wing & tail (primaries & rectrices) full grown & sheath all shed.

Body & head sufficiently feathered to appear well covered, but on blowing apart the feathers about  $\frac{1}{3}$  are still in sheath. Upper greater coverts still half-sheathed.

LOCUST GROVE NEW YORK.

*Sialia sialis* ♂ ad.

1885, Aug. 6. Molt not far advanced.

Wings: first six primaries & all the secondaries of both wings not yet shed. Last 3 primaries shed & new ones  $\frac{1}{2}$  grown. The 9<sup>th</sup> is nearly as long as the secondaries & was evidently cast & renewed first; 8<sup>th</sup> a little shorter; 7<sup>th</sup> less than half grown & more than half encased in its sheath. Upper greater coverts about 1 cm. long & still wholly in sheath. Tail not shed (all old feathers still firm). A few pin-feathers on rump & belly, but none yet on head or neck.

LOCUST GROVE NEW YORK.

Lower.

The tips are worn off the feathers of the crown, occiput, interscapular region, & breast, depriving the former of its beautiful blue & the latter (in part) of its chestnut. The tips of the wing & tail are also much worn, but possessing no ~~sharp~~ decided marking, are not much changed in appearance.

VERSO

*Melanerpes cythrophthalmus*

LOCUST GROVE, NEW YORK.

1878. April 5. Shot six *Melanerpes*. They have not yet quite finished molting. All the specimens killed have a number of "pin-feathers" about the head. C.S.M.

*Chrysomitris tristis*

LOCUST GROVE, NEW YORK.

1878. April 10. ♂ shot, "half changed from winter to summer dress" (Journ. I, 19). C.S.M.

*Sinurus auricapillus* ♀ im.

1885. July 27, C.M.M.

Young-of-the-year having almost completed its final moult. Primaries & rectrices full grown. Upper coverts of both (+ a few under) still showing sheaths at base.

Body well feathered above & below with a few feathers showing sheaths. About a dozen of the first plumage feathers remain in the back. They are rufous-brown with dark centres & contrast strongly with olive green of back. Top of head well-feathered, but first plumage down + fine feathers on neck all round, particularly above.

*Setophaga ruticilla* ♂ ad.

1885. July 25. C.M.M.

Moult nearly completed.

Wings: 4 outer primaries of each wing still with sheaths at base of quills; 1<sup>st</sup> primary  $\frac{1}{2}$  grown, 2<sup>d</sup> + 3<sup>d</sup> about  $\frac{3}{4}$  grown, + 4<sup>th</sup> full grown. A few secondaries + part of under coverts still encased in sheaths.

Tail: all of the rectrices + most of the under coverts still show sheaths at their bases.

The middle rectrices are full grown, the outer half-grown, resulting in a beautifully symmetrical graduated tail.

Head + body: a few scattered feathers still show sheaths.

*Sinurus arvicapillus* Fad.

1885. July 25, Conn.

In height of moult.

Wings: Secondaries & outer primaries not yet shed. Inner primaries & outer coverts about half grown. Under coverts shed & new just starting.

Tail: all gone - not a single feather left. New feathers about 20 mm. long.

Head & body: old feathers nearly all cast & new  $\frac{2}{3}$  grown on forehead & body; back of head & neck all around naked, new feathers (in case) just starting out.

1884.

Sable Island, Nova Scotia;

Rev. W. A. De Brisan, resident missionary, writes under date of Oct. 1884: "Nothing here now but high seas, lightning winds, scampering wild horses, and barking sea dogs."

1885.

SING SING, NEW YORK.

*Claytonia caroliniana*  
Time of flowering.

1870. April 18.

1873. May 7

1878. March 31 (Jour. I, 5); April 2 "in full bloom in large beds" (7).

" April 9, still abundant in full flower.

" " 12, "flowering so profusely now that it is

" " " almost impossible to step, in the woods,

" " " without treading on them" (21).

" " 24 Ground full with them in Col's woods. Air

" " " filled with their fragrance which is delicious at first

" " " but soon becomes sickening & actually nauseating

" " " to one walking thru the woods. Thousands of  
honey bees frequent them for nectar.

*Ursus Americanus*

LEWIS COUNTY, NEW YORK

1876. Oct. 2. Large Black Bear crossed our  
lawn within a few rods of the house  
& was seen by father, mother, Mr. C. B. Collins,  
Florence, & the child.

*Tamias striatus*

Appeared in Spring.

1870. March 21.

LEWIS COUNTY, NEW YORK

*Sciurus Hudsonius*

1875, Dec. 21. Common in our woods.

LEWIS COUNTY, NEW YORK

*Mephitis mephitis*

First appeared in Spring.

1870. March 18.

LEWIS COUNTY, NEW YORK

*Lepus Americanus*

In our own woods.

1875, Jan. 4. I shot a male here.

1884, Jan. 1. Saw tracks in our woods.

LEWIS COUNTY, NEW YORK

*Arctomys monax*

1876. June 25. Shot a 2/3 grown one in an ornamental tree on our grounds.

1878, April 2. Killed a large black headbuck.

1874, Sept. 11. Killed a ♂ weighing 9 lbs. & measuring 26½ in.

LEWIS COUNTY, NEW YORK

*Arctomys monax*  
Appeared in Spring  
1870. March 21.

LEWIS COUNTY, NEW YORK

*Arvicola riparius*

1874, July. Common. Killed many.

LEWIS COUNTY, NEW YORK

*Zapus rubescens*

1874, July. Common. Killed a number  
during 'haying'.

Arbutus texana  
("Slick tree")

Beaver and Rock Squirrels are fond of the  
bark of Arbutus texana, called by the  
Mexicans "Palo enquerado" (meaning naked tree),  
and by the whites, "Slick tree". - Wm Lloyd.  
(March 1886)

Toyah, Texas

# Flights of birds

Fall 1887.

to  
W  
Sept. 21 + 22. Heard birds passing  
overhead both nights, & at  
frequent intervals from  
shortly after dark till bedtime  
(went to bed early - before 10).  
Sept. 29-30. Cloudy, warm night after drizzly day.  
Awoke about 2 A.M. (Sept. 30) & heard birds passing till  
daylight began.  
Oct. 19, clear day, falling barometer & rain next day. Heard  
birds passing over all the day till midnight when went to bed.

## Flight of birds.

Col. John Screven, of Savannah, Ga.,  
tells me that on the nights  
of August 3<sup>d</sup> & 5<sup>th</sup>, 1886, between  
ten & eleven o'clock, he heard  
migrating birds passing overhead. He  
recognized "Dove & Curlew". The 3<sup>d</sup> was  
a rainy day & the next day cold, with  
a light snowstorm reported from New York.

## Fire Flies

Washington

June 12, 1887. Saw numbers on various lawns about the city in the evening. - C.M.

## Flight of Birds

1885.

New York City

Aug. 20, 1885, E. J. Adney writes: Last night at 11 P.M. a considerable number of birds passed over the city uttering a single note at intervals, "twink", "twink".

*Mus decumanus*

New Haven, Conn.

1876, Sept. 6. Dissected ♀ containing 9 embryos.

New Haven, Conn.

Raboon (<sup>mauritus</sup> *Cyncephalus* ?)

Zool. Garden, Litch.

Oct. 15, 1876. Saw a ♂ copulate 9 times in 15 minutes with the same ♀. "Between the acts" this ♀ recd. another male 3 times, making for her 12 complete copulations in a matter of an hour. The first male was chained. The last organs were evidently painful to him, & after withdrawing he took his penis in his hands & looked at it sorrowfully.

*Arctomys monax*

1874, June 6. Shot 3 young woodchucks near  
the mouth of timber hole. Eat all three.

*Synx rufus.*

1874.

Caught in a trap in the hills north west  
of Southampton about Feb. 10, 1874. I killed & skinned  
the best Feb. 12<sup>th</sup>. It was a ♂ juv. & measured  
21 in. to tip of tail, & 42 to tip of outstretched hind leg.  
It weighed 14½ lbs.

Had some of its flesh cooked & never  
ate better meat. Tasted more like first class  
veal than any other meat I think of.

*Zapus Hudsonicus*

1874

in Mass.

Feb. 11, 1874. Caught a ♂ at Easthampton.

Easthampton, Mass.

*Sciurus Carolinensis*

Young.

1874, April 8. Found nest on a pine tree  
about 30 feet from ground. It contained  
4 young, not yet haired over & with eyes shut.  
Preserved 2 in alcohol.

Easthampton

*Crotophaga sulcirostris*

Plessia, Jefferson Co., New York.

In F. & S. Vol. XXII, No. 8, Mar. 20/74, p. 144, J. L. Garrison of Lockport, N. Y. says that a Golden Eagle was sent to his son to be mounted, from Plessia, Jefferson Co., N. Y. "The fat of the Eagle was full of porcupine quills, and was probably the last animal he had dined off, & about as hot a meal as he ever had".

*Atalapha cinerea*

New York,  
Rochester

Prof. Henry A. Ward (for "H. A. W.") writes me that he has a specimen of Atalapha cinerea which was taken alive at Kenfield, about 14 miles east of Rochester, New York, Nov. 16, 1883.

Lake worm (Laeonia salinum).

Commenced to pass proglottids Sept. 23, 1878.  
Passed 21 ft. Oct. 11, 1878, but did not get head.

Commenced to pass (after several months of  
quiescence) April 1/83. Stopped passing in June/83  
(probably because sucking balsam pellets  
in Krasov's tract).

Quiescent in autumn of 1884, but recommenced  
passing Nov. 20/84.

Under pretty good headway in May, June & July 1885.

*Viola blanda*  
at Locust Grove, N. Y.  
April 19, 1878.

FLOWERING

LOCUST GROVE, NEW YORK.

*Dicentra cucullaria*

1873. May 10.

1878. April 19.

*Erythronium Americanum*

Time of flowering

1870. April 27.

1878. April 21.

*Trillium erectum*

Time of flowering

1870. April 27.

1878. April 21.

*Acer rubrum.*

1878. April 19 in fullest bloom & flowers have  
commenced falling. (Jour. I, 35.)

*Acer rubrum*

LEAFING.

1878. April 30. Leaves half-grown.

LOCUST GROVE NE TO

*Acer saccharinum*

LEAFING.

1873, May 24. Leaves opened rapidly after a warm shower.  
1878. Apr. 30. Leaves just coming out.

LOCUST GROVE NE TO

*Lagus ferruginea*

LEAFING.

1878. May 2. Leaves about half grown.

LOCUST GROVE, NEW YORK

*Larix Americana*

LEAFING.

1878. April 30. Tufts of needles on the little  
Tamarack north of our piazza are now  
an inch long.

LOCUST GROVE, NEW YORK

*Lilia Americana*

LEAFING.

1878. May 2. Leaves about half grown.

LOCUST GROVE NEW YORK

*Viburnum lantansides*

LEAFING.

1878. April 30. Leaves already measure 3 inches  
in length & the ~~stage~~<sup>cymes</sup> of white flowers  
are now open.

Apr. May 1<sup>st</sup> flowering abundantly &  
leaves 5 in. across.

LOCUST GROVE

## Archids of Adirondacks.

Ramsey B.rough has found  
Hahemaria stuekati + Sistrera conularioides.

## Amia

Ramsey B.rough writes me under date  
of Nov. 2, 1884: "In an aquarium in Watertown  
a short time since I saw a fish which  
I did not know was ever taken in  
Black River. It was an Amia, &  
the owner said that it was caught  
in Black River below West."

Black River, Jefferson Co. N.Y.

# Caregonus

(Riv. & Gulf St. Lawrence Notes, p. 85.)

New York.

Mr. Chas. J. Suck of Rouses Point, N.Y., caught a "Forest-fish" with a fly-hook on Upper Lake, on the Eastern Side of the Adirondacks.

## Salmo salar (Sea-Salmon)

In Lake Champlain -

Lake Champlain, New York.

A Fisherman told me (See notes on Riv. & Gulf St. Lawrence, p. 85) that he used to catch Salmon in Lake Champlain commonly 20-30 yrs. ago, every year. In 1875 he caught one weighing 6 lbs, near Rouses Pt.

*Nanemys guttata*

In captivity

1874. April 10. My pet turtle, Addison, died. He would come at my call & eat meat from my hand. He would follow me about the room.

Castroville

*Bufo Americanus*

In Canadian Sportsman & Nat. Vol. III, nos. 11 & 12, Dec. 1883, p. 283, John A. Morden states that he once found a dead toad "that a quagga wheel had crushed, & to all appearance its stomach must have contained at that time about a score of potato beetles besides other insects."

John Morden

*Andrytona punctatum*  
Appeared in spring.  
1870. April 18.

*Plethodon erythronotus*  
Appeared in spring  
1870. April 15.

Shaw - indication of dry trees.

Shaw & Hlser. III, 42,

## Meleagris gallopavo -

1641. The Rev. Mr. Megapolensis, writing in 1641 of the Magua Indians, states that at Albany, then called Beaverswycck, "there were so many turkeys & deer that they came to the houses and wigwags to feed, and were taken by the Indians with so little trouble, that a ~~deer~~ was sold to the Dutch for a loaf of bread, or a knife, or even a tobacco pipe".<sup>†</sup>

<sup>†</sup> History of New Netherland, by E. B. O'Callaghan, M.D. Vol. I. 1848, p. 326, footnote 2.

## Corvus Carolinensis

Barton's Fragmenta Hist. Lem. Phila. 1799.

New York. Benjamin Smith Barton, M.D., stated that "a very large flight of parakeets, which came from the westward, was seen, a few years ago, about twenty-five miles to the north-west of Albany, in the State of New-York. The arrival of these birds in the depth of winter was, indeed, a very remarkable circumstance. The more ignorant Dutch settlers were exceedingly alarmed. They imagined, in dreadful consternation, that it portended nothing less calamitous than the destruction of the world". And in a footnote he

Says: "This fact was communicated to  
me by Egbert Benson, Esq. of the State of  
New-York". (p. vi.)

VERSO

*Buteo lineatus*

1874, April 18. Found nest about 40 ft. from ground in pine. Climbed to it with great difficulty. It measured 25 inches in external diameter by 12 in depth, & was lined with green hemlock twigs & a few feathers. It was placed against the trunk of the pine, resting on a horizontal limb, not in a crotch. It contained 3 fresh eggs.

*Scalcopteryx ferrugineus*

June 15, 1883.

Nest & 4 fresh eggs. While paddling up North Branch of Mass. River between 2<sup>d</sup> Lake and Big Mass I saw a rusty blackbird leave her nest, which was in an Ilex verticillata bush about 600 mm. (2 ft.) above & overhanging the water. Put the boat in & Dr. A. K. Fisher, who was in the row, took the nest without moving from his seat. Nest: greatest external diameter 230 mm., ext. depth 75; internal diam. 90 mm., inter. depth 50 mm. Outside of small sticks & twigs; inside of grass in a thin mud

Shell (like that of Robin, only thinner, lined  
with the same fine glass. A few bits of  
lichen & moss in the outer part  
& attached to mud cup.

VERSO

*Zenaidura macroura*

Shot in (August?) 1883. Specimen  
owned by Charles Dwyer of Lenoir.

Lenoir, New York

*Hydrochelidon lunifrons*

Shot near Lenoir, N.Y. Sept. 8, 1883,  
by James H. Miller from his  
collection.

Lenoir, New York

Caprobuccinus rufus.

Buffon, Seneca Co., New York.

Under date of Mar. 18, 1884, James D. Burham writes:  
"The Brown Thrasher has not been here  
in this County [Seneca] for some time.  
We used to think, on his arrival it was  
time to plant corn."

Melanerpes erythrocephalus

Buffon, Seneca Co., New York.

James D. Burham writes (Mar. 10, 1884): -  
"I have known the Red-head Woodpecker  
to go from one County to another, and  
to go soon enough to secure food for the  
winter. Some years there will be plenty  
of beechnuts in one County & not in another.  
Consequently they are stored for winter  
use in holes in trees and barrels of trees."  
A week later (Mar. 18<sup>th</sup>) he writes: "The Red-head is  
not here this winter [1883-84]. We have not had any  
beechnuts for 3 winters. He stays only when there

is plenty. Have you ever known of his  
storing insects for future use? I discovered  
in Sept. 1883, one of these birds picking at a  
dry cedar stake. I found in the top of it  
a cavity where the bird was picking several  
insects, grasshoppers and the potato beetle.  
I have been looking a good many years for  
this discovery.

Jan. 27, 1884. ♀ shot within two miles of  
Tray, New York. — Austin H. Park.

Tray, New York

# Picoides arcticus

Oct. 6, 1883, a ♂ Picoides arcticus was shot  
at Poestenkill, Rensselaer Co., New York (8 miles  
east of Troy). — Austin & Parke.

Troy, New York.

## Birds & Animals

1630. On a map of Rensselaers Wyck pub-  
lished in 1630 is stated: "Opposite the East  
[East Orange], on the eastern head of de East's Island  
are many birds to be shot, such as geese and  
swans and cranes and turkeys frequent  
the woods. Deer and other game are  
also there, and wolves but not larger  
than dogs." (See O'Callaghan's Hist. New  
Netherlands, 1848, ~~opposite~~ facing p. 205.

New

*Nesporocichla naevia*

Mr. Geo. H. Lawrence says (Annals Linn. Soc. N. York, vol. 1852, pp. 221-222): "A varied Thrush was obtained in the vicinity of New-York in December of last year [1851]#... One other instance of it being found here, was noticed a year or two since by Dr. Samuel Cabot, in the Journal of the Boston Society of Natural History!"  
Prof. Baird says: "has been shot, on Long Island in New Jersey" (Distribution & Migration of N. Am. Birds. - Am. Jour. Sci. & Art, vol. XLI, Jan. 1866).

*Melanerpes erythrocephalus*.

Saving up stores for winter.

W.S. 22 miles west of Milwaukee  
John Brady writes me that the Red head "stuffed all winter if it was going to be a mild winter & always laid up safe nuts, & would steal a head of wheat & fly off with it & hammer it into some crack in some tree, & would hide away corn the same way. I always expect a mild winter when I see him hide food away.
